Portfolio: mariam-saeed.vercel.app

Summary

Frontend Developer with 2+ years of experience independently building and delivering client websites using Vue.js, Nuxt.js, React.js and Tailwind CSS, owning projects from setup to launch. Contributed to open-source projects including OpenHands, DocsGPT, and IBM Carbon Design System.

Work Experience

Frontend Developer 03/2025 – Present
Ntsal Cairo, Egypt

- Developed 8 client websites using Nuxt.js, Vue.js, and Tailwind CSS, independently owning 6 projects end-to-end from initial setup to launch.
- Introduced framework-native patterns for image delivery, font loading, and SSR data fetching, replacing manual implementations across the codebase.
- Built dynamic content layouts that adapt their structure based on item count, featured status, and CMS-defined content types across multiple client websites.
- Implemented interactive components with nested navigation levels, where parent selection drives synchronized updates across all child content and state.
- Integrated frontend components with a custom CMS, enabling dynamic content updates without code changes.
- Resolved cross-browser and cross-device bugs, including iOS video playback and Firefox rendering inconsistencies across multiple client sites.
- Live Projects: thelocalshow.net, thedesignavenue.net, marsabaghush.com, charobim.art

Full Stack Developer 04/2024 – 09/2024
Remotecoders (Swiss client: Fairpicture) Cairo, Egypt

- Developed an end-to-end project cost calculator using Django and JavaScript, supporting multi-currency estimation based on services, production and travel duration.
- Built user management features for the FairConsent admin panel, including listing, search, single and multi-selection, deletion, and deactivation on the frontend, with corresponding Django backend logic.
- Implemented chat message edit and delete functionality with a one-hour restriction window, handling both frontend and backend.
- Enhanced platform UX through multiple improvements including drag-and-drop table interactions, logo upload with instant visual feedback, and various bug fixes to maintain platform stability.

Open Source Contributions

OpenHands | 66.4k+ stars | PR #12041

- Resolved global state conflicts in the conversation store by decoupling local UI loading states from global action panels, improving UI consistency and reliability without affecting other loading flows.

DocsGPT | 17.3k+ stars | PR #2033

- Developed a “What’s New” notification component using React, configurable via environment variables, with localStorage-based persistence to manage user dismissal across sessions.

Carbon Design System (IBM) | 8.7k+ stars | PR #20808

- Standardized readonly and disabled states for Select components across both the React and Web Component libraries, updating unit tests to ensure UI consistency.

Technical Skills

Frontend: Vue.js, Nuxt.js, Pinia, React.js, JavaScript (ES6+), TypeScript, HTML5, CSS, SASS, Bootstrap, Tailwind CSS, Material UI, Vitest
Backend: Django, Python, Node.js, Express.js
Tools: Git, GitHub, GitLab, Docker, Swagger, Postman, ClickUp, KanbanFlow

Education

Higher Technological Institute, 10th of Ramadan | Bachelor’s Degree, Computer Science 2017 – 2021

Certificates & Courses

Frontend Nanodegree (Udacity) | CS50 (HarvardX) | React Basic (HackerRank)
